REHABILITATION AND HEALTH CARE CENTER ACHIEVES EXCELLENT SURVEY

McHenry, Ill. (December 3, 2007) – Alden Terrace of McHenry Rehabilitation and Health Care Center achieved a deficiency-free survey from the Illinois Department of Public Health (IDPH). IDPH is the state regulatory body that ensures the safety and quality of health services provided to residents and patients at health care facilities. Alden Terrace of McHenry, which provides programs and services to address the needs of short-term therapy and rehabilitation patients as well as long-term residents, underwent a three-day survey that included extensive interviews with nursing staff and other employees as well as residents and their families, reviews of medical records, programs and services and tours of the facility and patient areas. IDPH surveys are unannounced, which makes the facility's achievement even more impressive.
